---

## **RFCA STANDARD OPERATING PROTOCOL (RSOP) FOR FACILITY COMPONENT REMOVAL, SIZE REDUCTION, AND DECONTAMINATION ACTIVITIES AVAILABLE**

The Rocky Flats Cleanup Agreement (RFCA) Standard Operating Protocol (RSOP) for Facility Component Removal has been approved by the regulators and is available to the public for viewing. This RSOP was developed to streamline the regulatory process, cover routine decommissioning and describe technical methods, including:

- ◆ Physical removal of facility components (e.g., gloveboxes, tanks and ancillary piping, fume hoods, ventilation and filtration systems, other utilities and equipment, interior and exterior walls, ceilings, floors, roofs and other structural members).
- ◆ Size reduction of components to meet property reuse, waste management and/or transportation requirements

The Rocky Flats Environmental Technology Site (RFETS) is a Superfund cleanup site owned by the U.S. Department of Energy and operated by Kaiser-Hill L.L.C. The Rocky Flats Cleanup Agreement (RFCA) is the environmental regulatory framework for the cleanup and closure of Rocky Flats.

The RSOP is accessible on the Rocky Flats web page: [www.rfets.gov](http://www.rfets.gov) and at the following Public Reading Rooms:

Rocky Flats Public Reading Room 3705 West 112 <sup>th</sup> Avenue Westminster, CO 80030	Standley Lake Library 8485 Kipling Street Arvada, CO 80005
